Company

Born in 1965, today FIORE is a well-known name, esteemed by businessmen of the same sector as well as the consumers themselves, in Italy and all over the world.

The reason behind this rapid growth and the commercial successes which followed are due to the competence of those working in the company as well as to the large investments made by Fiore Rubinetterie over the years.

Project

Fiore production starts from the study of the design according to the customer requirements, market trends and strong desire of innovation. Fiore Research and Design Center is constantly moving between experimentation and technology following the latest innovations regarding manufacturing systems, product optimization and design trends.

Quality

Product quality, attention to the customers' needs and the ability to meet their requirements in the shortest time possible are the focal points of Fiore philosophy and the reason for our continuous success.

*Made in Italy
since 1965*

#savewater

Water Saving

Saving water makes sense

Water is the essence of life. This makes us proud to contribute to the sustainable development of green cities by supplying our products able to save this precious natural asset.

Green building projects all around the world use these max flow rate:

Private use 6 l/min max basin and sink

Private use 9,5 l/min max bath and shower

Public use 1,9 l/min max basin and sink

Eco Stop cartridge

Mixers equipped with Eco Stop cartridge can save on:

- Water: the usage of water is reduced approximately by 60%. By the smooth gesture you open the lever and get a sufficient water flow for daily use. If you desire the maximum volume, you just need to rise the lever until the maximum position.

- Energy: the handle in its central position generates only cold water avoiding to mix hot and cold water from the beginning. In this way, the energy needed to produce hot water is reduced. Only when the hot water is really desired, the lever is turned.

Standard cartridge	100%
Eco Stop Cartridge	40%
